Junior Software Engineer with around 1 year of experience specializing in MERN stack development. Proficient in building dynamic and responsive web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in both frontend and backend development.

MY WORK

REACT-PROJECT

Movix

<https://movix-kappa-ten.vercel.app/>

In this project, I am learning about top frontend technologies like React, Redux, and SCSS. In this course, and the core concepts of React.js like jsx, components, props, state, lifecycle of components, conditional rendering, lists, keys, and redux, I built more complex logic in JavaScript to make my React app super interactive and beautiful. Learn about APIs and how to handle requests and responses.

WORK EXPERIENCE

Junior Software Engineer

*Acquaint Softtech Pvt Ltd | Ahmedabad, India
August 2023 – Present*

- Developing and maintaining web applications using React.js and Node.js.
- Implementing state management solutions using Redux.
- Creating responsive and interactive user interfaces with CSS and UI libraries such as Tailwind CSS and Ant Design.
- Building and consuming RESTful APIs.
- Collaborating with cross-functional teams to deliver high-quality software solutions.
